

UOL001 Spen Farm Spring 2024

Field Operations sampling plan

17-Jan-24 version 1

CONFIDENTIAL

‘Standard’ Fields UOL001-A01

UOL001-A01 Farm fields 3 & 4

- 15 cores per field
- 5 cores per field for acid testing (strata T – used internally by Agricarbon to set acid levels)

Regen Ag trial plots field – UOL001-A02

Fields 1 to 21

Plots are 40 x 12m

3 carbon cores/plot

1 nutrient core/plot (strata N)

5 acid test cores (strata T) used by Agricarbon internally to set acid dose levels

Total for area

63 carbon cores

21 nutrient cores

5 acid test cores

Agroforestry field – part A01

Field 1

48 core grid in open grassland (spread approx. same as agroforestry)

5 nutrient cores (strata N)

2 acid test cores

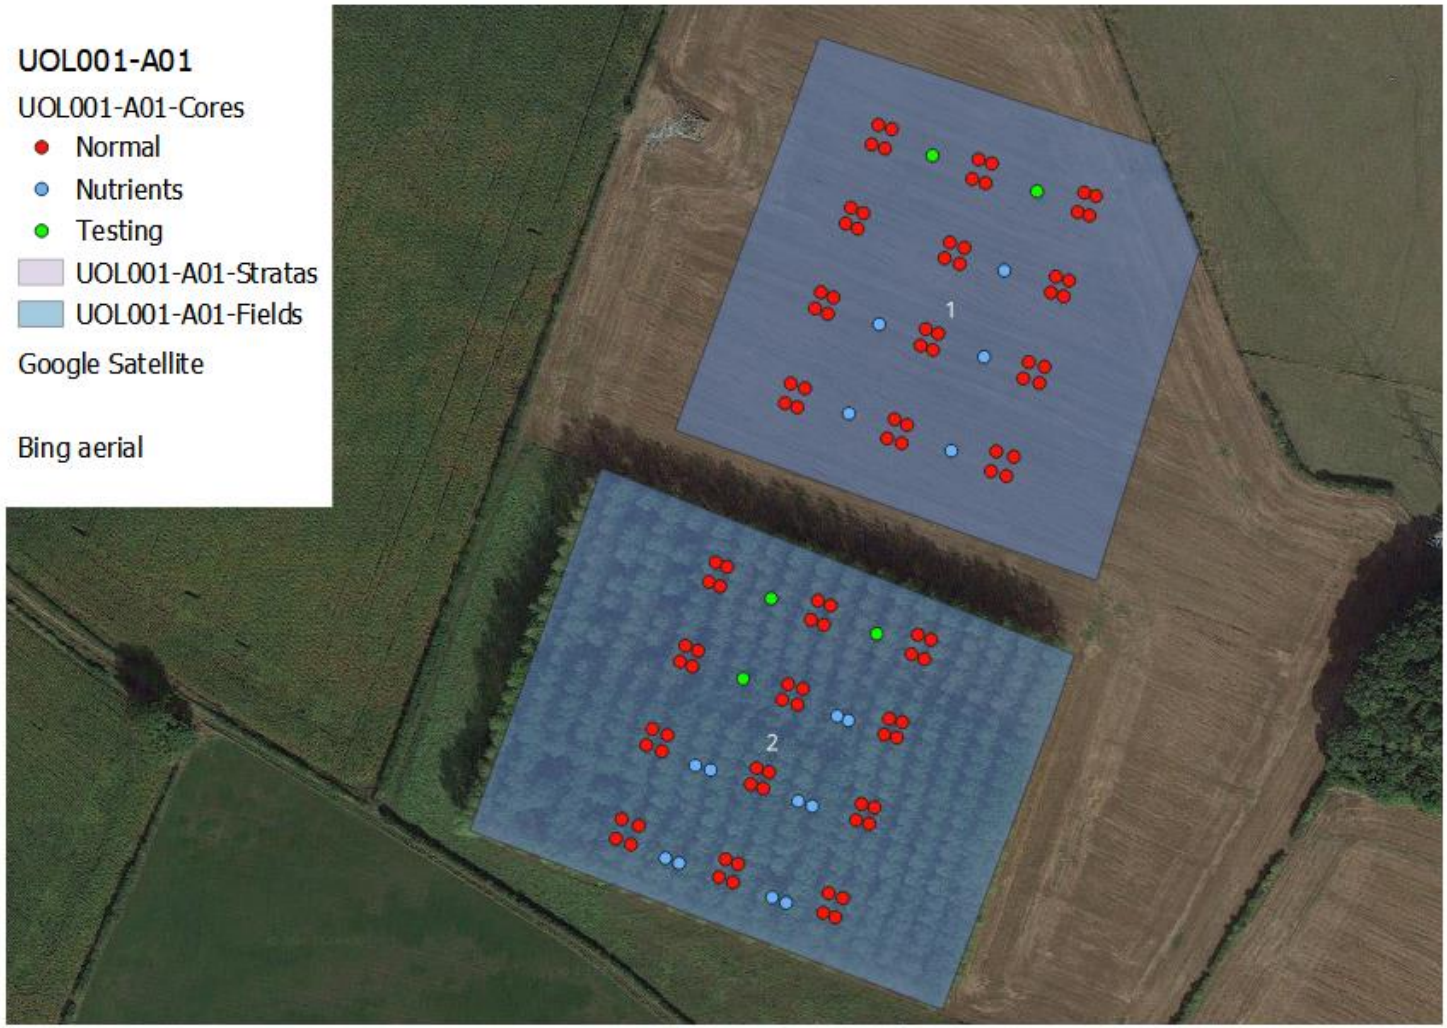

Field 2

48 core grid in agroforesty, cores moved to line up to trees as per the agroforestry sampling design

5 nutrient cores (strata N) in line of trees

5 nutrient cores (strata N) in alley between trees

3 acid test cores (strata T)

Agroforestry field – part A02

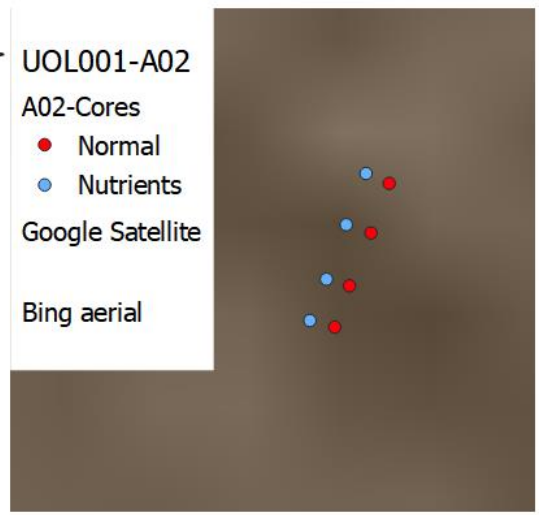

UOL001-A02 Farm files Fields 22-24

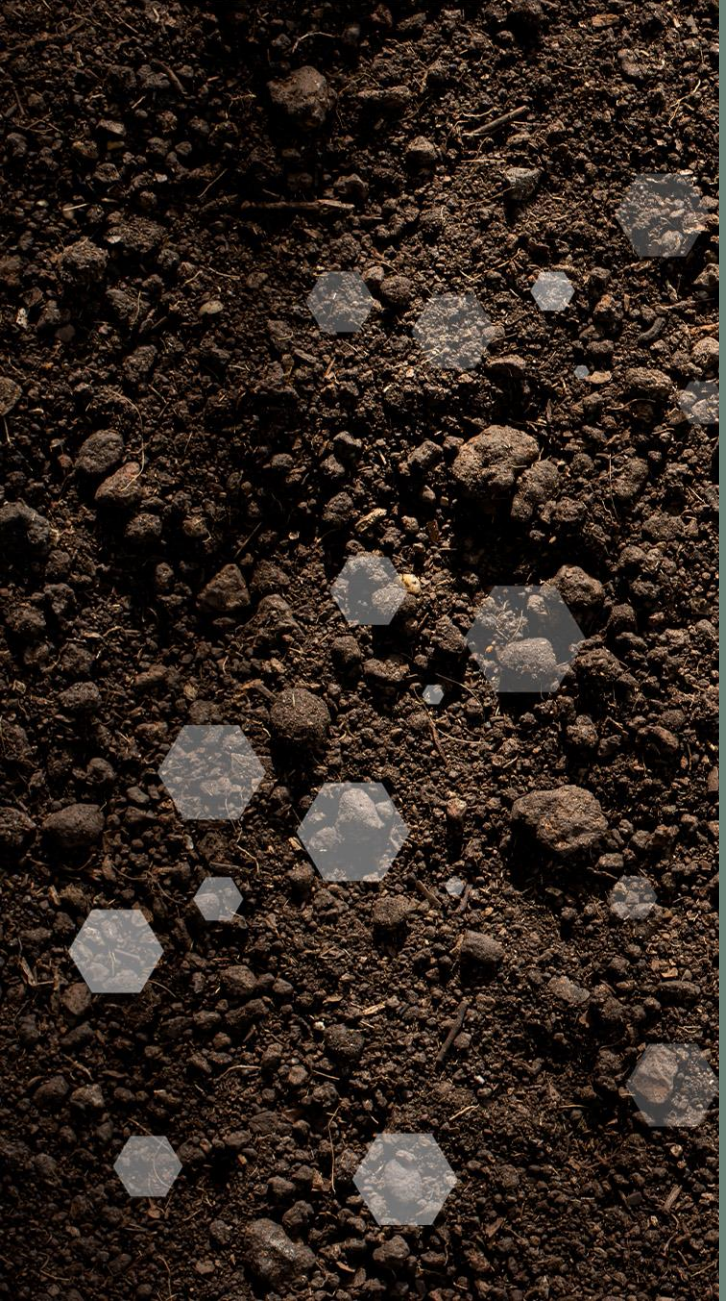

Pit Digs x 3

- 4 carbon cores in a group
- 4 nutrient cores in a group (strata N)
- Leave a physical marker / GPS point

- Grassland / Between Trees / Alley between trees

Agricarbon

Agricarbon UK Ltd is a company registered in Scotland under Company Number SC592928,
