Cumulative SOC stock (Mg C ha^{-1})

0 | 25 | 50 | 75 | 100

0 | 2,000 | 4,000

Cumulative soil mass (Mg soil ha^{-1})

▲ ESM−corrected 0−15 cm SOC stock ■ ESM−corrected 0−30 cm SOC stock

Black: measured cumulative coordinates joined linearly from the origin. Purple dashed: extension using the final measured layer SOC content.
Grey dotted lines: arable mean cumulative reference masses (1775 and 3733 Mg soil/ha). Coloured symbols: evaluated stocks.
* Shallow bedrock: upper−reference estimate only; no lower interval or full−profile estimate. Shared axes; labels show land cover and company core number (Field 2).
